

3 IN 1 - CALENDER + BENDER + SHEAR 305MM

Three in One

An ingenious machine for working with sheet metal up to 30cm wide and 1mm thick (0.8mm steel). This machine performs three functions:

- Cutting. Equipped with precision-adjustable blades, a clamp and an adjustable stop.
- Folding. Equipped with a partially adjustable pressure blade.
- Rolling, with the ability to asymmetrically adjust for cylindrical and conical shapes. Also has grooves for bending round bars.

Key Features:

- Ideal combination of three functions in one machine
- Sturdy steel structure
- Folding blades divided into segments for maximum flexibility
- Double manual levers
- Two-position handle
- Able to cut medium-hardness steel, aluminum, brass, lead, copper and plastic

Technical Specifications:

- Maximum working width: 305mm
- Maximum cutting thickness: 1mm
- Maximum folding thickness: 1mm
- Maximum bending angle: 90°
- Maximum bending thickness: 1mm
- Minimum bending diameter: 39mm
- Machine dimensions: 49 x 33 x h. 42 cm
- Packaging dimensions: 65 x 40 x h. 46 cm
- Weight: 45 Kg
