

XENOX MHX MOTOR HAND TOOL + MAIN ADAPTER

The driver tool is the ideal tool for grinding, milling, drilling, polishing and cleaning.

The ergonomic design was optimized for sensitive working.

The thyristor electronic speed control enables the selection of speeds from 5.000 to 20.000 rpm. Phase angle control and feedback effect circuitry yield high torques, even at low speeds. Two collets for shanks in the range 2,4 and 3,2 mm are supplied.

Power consumption is 40W.

12 V supply allows the safe use of coolant.
