

PROXXON MICRO WOODTURNING LATHE DB250

The PROXXON DB250 is an ideal micro lathe for model making enthusiasts. Perfect for making glasses, cups, saucers, vases, and columns for dollhouses. In model trains, it allows the creation of lighting masts, windows, and tanks. With this lathe, limbs for marionettes and hundreds of other miniature turning tasks can be carried out with ease. The electronic speed control assists in the lower range in a 'semi-automated' painting process. **Technical data:**

- Motor: 230V, 100W, 50/60Hz
- Centre distance: 250mm
- Maximum turnable diameter: 40mm
- Maximum turnable diameter over support: 25mm
- Variable speed control: 1,000 - 5,000rpm
