

BULLSEYE STRINGERS - 0120 CANARY YELLOW 180 GM TUBE

These spaghetti-like pulls of glass are beautifully straight, yet thin enough to be bent into any shape with the heat of a candle flame. Great for detail work, outlines, and bead making. Stringers are threads of glass which have been pulled from remelted fusible Bullseye sheet glass.

They are 1 mm. diameter and approximately 40 cm. long.

The 180 gr. tube contains approximately 150 stringers.

Bullseye stringers are COE90, compatible with Bullseye, Uroboros and Desag products.
