

DOUBLE HELIX ROD - EKHO - 1 ROD

Double Helix rods are 30cm in length, between 5mm and 6mm in diameter and have been tested compatible with Effetre Moretti COE104 clear. They are sold by the piece

Ekho was designed to offer features of both reduction and striking colors. Ekho can retain a pearlescent luster under encasement, while striking during normal beadmaking operations. For best results, Work Hot, Cool, Reduce, and Encase. Melting the clear encasement using a cool flame will encourage a "mother of pearl" luster, while reheating the encased Ekho will further develop the struck tones.
