

FUSING MOLD - ALMOND 37,5 X 23,8 X 6,2 CM

This elegant template offers numerous applications from art object to lifestyle accessory, gift object and many more. The size and depth of the mould also suggests the option of dinner ware for salads, deserts etc.

The mould has a small base which makes the glass object potentially unstable if used as dinnerware. To increase the size of the base, you can cut a thin layer of ceramic fibre board to fill up the most narrow part of the mould. You can cut the glass shape to match the full outline of the mould, but you can also use a smaller piece of glass or one with an uneven outline.
