

FUSING MOLD - BANANA LEAF SMALL 33,5 X 12 X 3,5 CM

A mould to simply reproduce one of the most popular exotic leaves. Highly realistic rendition of texture, outline and movement. The Banana leaf may be an art object by itself, but it may also be slumped into a bowl in a subsequent firing.

By cutting the glass smaller than the mould size, you can alter shape and size of the object. Pre-fuse a layer of a light transparent glass onto clear to obtain a slight colour shading as a result of the varying thickness produced by the texture.
