

ALKEME BLANK - HEART 19 MM - 9 PCS

ImpressArt blanks are the canvas for your metal stamping projects and come in hundreds of shapes.

Alkemé is a unique tin alloy, tarnish free and easy to stamp. Alkemé has a weight and gauge one would expect from a fine piece of jewellery. All Alkemé blanks are 1 mm thick. This provides enough metal material to allow the stamp to make a deep impression.

Alkemé can be easily polished with hand burnish, tumble or flexible shaft tool to get a high shine.

Alternately, using a fine abrasive you can achieve a nice matte finish.

Alkemé can be easily formed with a dapping block.
