

JEWEL MINI MOLD - JEWELLERY CUT SQUARE & OVAL

This plastic mold is designed for transparent or UV resins, but it's also suitable for Metal Clay, polymer clay or ceramic clays. Made of rigid plastic, which guarantees excellent results. Resist at maximum temperatures of 70 ° C and minimum of -20 ° C.

When used with two parts resins, we suggest to make extraction before the final catalyst. When used with UV resins, make extraction as soon as the mold will be out of UV kiln. Dimensions 50 x 40 x sp. 10 mm.
