

PROMETHEUS KILN PRO-7-PRG W. BEAD DOOR

Prometheus PRO7-PRG: Versatile programmable kiln
 The Prometheus PRO7-PRG is a programmable electric kiln, ideal for firing **Art Clay Silver**, Metal Clay, enamels on copper and silver, small ceramic or glass objects. Equipped with a convenient bead door, it allows quick insertion of beads or glass items for tempering and is also useful for enameling on copper. The digital programmer can store up to 15 programs with 5 segments each, offering maximum flexibility. The internal heating elements ensure uniform and precise temperature.

- Programmable controller: 15 storable programs with 5 segments each.
- Bead door: perfect for quick insertion of items during firing.
- Suitable for complex firings like Metal Clay and enamels.
- Uniform temperature distribution thanks to internal heating elements.
- Low energy consumption (1900W): suitable for domestic use.
- Maximum temperature: 1100°C.
- Requires a refractory shelf sold separately (code #45326).
