

RAKU THERMOCOUPLE + DIGITAL THERMAL INDICATOR

Type K thermocouple set with digital thermometer, designed for temperature monitoring during Raku ceramic firing. Equipped with a 60 cm probe and handle, it allows safe operation at a distance from kiln heat. Ideal for quick and reliable measurements up to 1300°C, offering a practical solution for ceramic artists and craft professionals during firing processes. **Key features**

- Type K probe with 60 cm length and handle for safe use
- Perfect for Raku firing and high-temperature environments
- Allows measurements at a safe distance from the kiln
- Includes digital thermometer for immediate readings
- Reliable and practical tool for ceramic work

Technical specifications

- Type: Type K thermocouple with digital thermometer
- Probe length: 60 cm
- Maximum temperature: 1300°C
- Applications: Raku firing, ceramic kilns
- Package includes: probe with handle + digital thermometer
