

BEAVERCRAFT LS5P1 - PADDLE STROP FOR SPOON KNIVES W. P1 POLISHING COMPOUND

This strop for sharpening spoon knives is multi-functional and aims to keep your blades at peak performance. The strop is a versatile professional hook knives sharpening and honing system. The double-sided strop is divided into 2 parts – leather strop and sandpaper strop. The leather side is used for polishing, the replaceable sandpaper side – is for light sharpening.

This paddle is unique and can be a bit confusing to some, so let's make it clear: like a razor strop, this strop for sharpening hook knives is used to put a very fine edge on your curved blade, use leather strop side with polishing compound to get the sharpest edge possible. The rough leather surface is used in conjunction with the polishing compound to remove hardened steels. It includes a bar of BeaverCraft polishing compound designed to adhere to the strop by rubbing the bar on the leather surface of the strop. Also two sheets of spare sandpaper are included.

Technical specs:

- Dimensions of leather / sandpaper: 170 x 70 mm
- Total Length: 310 mm
- Base material: Ashwood
