

VENTURI BURNER 20 KCAL WITH PRESSURE REDUCER

This burner is the ideal solution for heating the oven for Raku Zeroquattro.

Key Features:

- Equipped with a safety system, which blocks the flow of gas in case the flame goes out
- The adjustable support allows you to adapt it to different heights
- Supplied complete with non-return valve, pressure reducer (with connection compatible with Italian cylinders) and rubber hose (5 meters total)

Technical specifications

- LPG powered
- Heating power 20,000 KCl / h
- Pressure: 0.8 bar
