

CASTING MOLD - JEWELRY OVAL PENDANT

This pendant shape is a classic. The resulting pieces are smaller and more delicate - the smallest are perfect for earrings. Fill them with plain frit or use a combination of frit and dichroic flakes to create exceptional pieces that can be suspended from leather, rubber, silk, or metal cords. Because of the mold's engineering, the pendants almost never require any cold work like grinding or polishing.

- The pendants measure 20, 25, and 30 mm wide.
- The mold itself measures 152 x 130 x 25 mm
- The fill weights are 11, 6, and 4 grams.
- We suggest using Zyp Boron Nitride spray with this mold.
