

CASTING MOLD - JEWELLERY TEARDROP PENDANT

The teardrop motif has been an enduring design. Fill them with plain frit or use a combination of frit and dichroic flakes to create exceptional pieces. Make earrings from the smaller teardrops or suspend the castings from leather, rubber, silk, or metal cords to create beautiful necklaces. Because of the mold's engineering, the pendants almost never require any cold work like grinding or polishing.

- The pendants measure 23, 28, and 35 mm wide.
- The mold itself measures 171 x 130 x 25 mm.
- The fill weights are 11, 6, and 4 grams.
- We suggest using Zyp Boron Nitride with this mold.
