

JESMONITE AC100 RETARDER 1 KG

Retarder is designed to extend the working time of all Jesmonite materials.

- Extends the working time of Jesmonite
- Solvent and VOC free
- Version suitable for Jesmonite AC100, AC200 and AC300

How to use

- Add 2-10 grams of retardant to the liquid part of Jesmonite before mixing it with the base
- Perform tests in the work environment, as extreme temperatures and humidity can affect the set times.
