

HEARTY SOFT CLAY WHITE 200 GR

Hearty Soft is a professional-grade modeling clay with an advanced formula known for its elasticity and strength.

- It has a soft and velvety consistency, similar to a marshmallow.
- When mixed, it becomes very plastic and sticky to the touch.
- This clay is extremely malleable and sticky, making it easy to stretch and pull into irregular shapes.
- If you need pieces of the same size, it is recommended to roll the Hearty Soft "sausage" and cut it with a knife or scissors into equal parts. This is especially important when sculpting petals and leaves.
- It hardens completely when exposed to air.
- Once dried, you can carefully paint it using acrylics, watercolors, or pastels. To achieve a finished look and protect the surface from moisture, it is advisable to apply a layer of matte or glossy finish.
- Perfect for creating flowers, fake sweets, miniature food, accessories, and other craft projects.
