

REVOLUTION XT - COMPLETE MAGNETIC TROLLEY KIT 250MM

With this Revolution XT saw accessory, you can achieve precise and square cuts regardless of the material or cutting speed used. The slide tray for Revolution XT also incorporates powerful magnetic stops that help make 45-degree cuts both on and off center. When positioned upright, they produce perfect 45-degree edges, either blunt or sharp as desired. This accessory comes with a double-sided rule in millimeter increments on both sides of the blade. Exact measurements are set, taking into account the blade kerf, so no calculation is necessary for making any size cut.
