

JESMONITE PIGMENT SET 13 X 10 GR

Jesmonite pigments are perfect for coloring Jesmonite AC100 or AC730, providing excellent chemical and thermal stability when mixed.

- Adding approximately 2% pigment will produce a strong and saturated color.
- For lighter colors, reduce the amount of pigment until the desired shade is achieved.
- Mix pigments together to create custom colors.
- Viscosity varies by color; separation is natural, so shake vigorously before use.
- Pigments may thicken slightly over time and can be diluted by placing the container in hot water and stirring or shaking the pigment. Do not add water to the pigments.
- This set includes the following 10-gram colors: 2x white, 2x black, 1x yellow oxide, 1x bright yellow, 1x orange, 1x red oxide, 1x terracotta, 1x bright red, 1x green, 1x blue, 1x coade, 1x purple, 1x pink.
