

## HOMARE PLASTIC FILE MEDIUM FINE GRIT 16 MM

High-quality Japanese Homare files.

- They have a delicate action compared to European-made files.
- Abrasive surface that does not clog, developed in collaboration with Niigata University.
- Being hardly cloggable, they are ideal for finishing soft materials such as wood (e.g., stringed musical instruments) and aluminum, as well as for plastic processing.
- Dimensions 230 x 16 x 3 mm thickness
