

ANNEALED GALVANIZED WIRE HANK 5X2 MM 333 GR

Annealed galvanized wire in coil, 5 x 2 mm, supplied in approx. 330g spools wrapped in protective polyethylene film. Designed for general binding use, it is especially suitable for tying rebar in reinforced concrete work thanks to its flexibility and rust resistance.

Key features

- Strong and flexible annealed galvanized wire
- Lightweight, easy-to-handle spools
- Protected by polyethylene film
- Main use: tying rebar for concrete reinforcement

Technical specifications

- Wire size: 5 x 2 mm
- Form: coil
- Spool weight: approx. 330 g
- Material: annealed galvanized iron
- Packing: PE film
