

ARBORTECH TURBOSHAF - POWER CARVING ACCESSORY

The TURBO Shaft is an ideal tool for detailed freehand power carving. Perfect for deep and narrow profiles, lettering, template work and more, the TURBO Shaft provides a unique combination of efficiency and control.

Equipped with durable tungsten carbide teeth, the TURBO Shaft includes an adjustable depth gauge making it easy to quickly set your preferred cutting depth in even the hardest of timbers. **Product Features**

- Freehand fine sculpting and boring tool
- Compact and narrow design allows for carving hard to reach places
- Tungsten carbide teeth are rotatable and replaceable
- Limited side exposure improves safety
- Can be used with guides or templates for accuracy
- Attaches to standard 100mm (4") and 115mm (4 ½") angle grinders
- Works best with Power Carving Unit
