

NABERTHERM GFM 520 KILN

Designed for maximum flexibility, the Nabertherm GFM glass-fusing kiln features a roll-out working table that lets you load outside the chamber, boosting workflow efficiency. Optimised insulation, Solar Mode and short cycles cut energy use, while the AC590 6.8-inch touchscreen controller offers 50 editable programs, Wi-Fi connectivity and precise data logging for creative and industrial production. **Key features**

- Heated hood with fixed frame
- Mobile interchangeable table with adjustable heights
- CLP-safe insulation materials (non-carcinogenic)
- NTLog Basic and MyNabertherm app for remote monitoring
- Free NTGraph/NTEdit software for data analysis

Technical specifications

- AC590 controller: 6.8" touchscreen, 50 programs, 40 ramps, Wi-Fi/USB
- Optimised insulation for short cycles; Solar Mode compatible
- Roll-out table on swivel wheels; quick-swap table system
- Data logging via NTLog Basic; hour & kWh counter, error archive
- Kiln furniture set not included; order separately

SPECIFICHE

SKU	Computer type	Max. Temp	Power	Voltage
