

## CERNIT - SET OF 2 RIGID BLADES

Very thin and extremely sharp, Cernit blades are ideal for precision cutting of polymer clay. They are suitable for all techniques, including millefiori, kaleidoscope, mokume and more. Each blade is supplied with a rubber cover for safe storage. This set includes two rigid blades. **Key features**

- Very thin and extremely sharp blades
- Precise cutting of polymer clay
- Suitable for all modelling techniques
- Rubber cover for safe storage
- Set of 2 rigid blades

### Technical specifications

- Contents: 2 blades
- Type: rigid
- Use: polymer clay
- Safety: rubber blade covers included
