

TECHNIGLASS THE EDGER

Techniglass The Edger is a simple yet essential tool designed to improve safety when preparing glass edges for copper foiling or lead came assembly. Two extra-fine abrasive stones work simultaneously on both edge corners, quickly removing razor-sharp protrusions and jagged edges. A central notch allows the tool to reach even the tightest inside curves, smoothing glass edges with a single pass. **Key features**

- Quickly removes sharp and hazardous glass edges
- Two extra-fine abrasive stones refine both edge corners at once
- Center notch reaches tight inside curves
- Ideal for copper foil and lead came work
- Suitable for hobbyists, instructors and professionals
- Usually requires only one pass along the glass edge

Technical specifications

- Glass thickness range: 1.6 mm to 6.4 mm (1/16" - 1/4")
- Compatible with smooth and textured glass
- Suitable for small cut pieces and full-size sheets
- Dimensions: 4.45 x 9.50 x 3.15 cm
- Weight: 136 g
- Dual fine-grit abrasive stone construction
