

PROXXON PS 18 PEN SANDER SET

The Proxxon PS 18 pen sander is the successor to the popular PS 13 and is designed for precision sanding in modeling, prototyping and 3D print finishing. Its linear sanding action makes it ideal for working inside recesses, grooves, cavities and tight corners that are difficult to reach with conventional sanders. Lightweight, compact and highly controllable, it features three selectable speeds and includes a set of straight and angled sanding inserts in different shapes.

Key features

- Excellent for refining and finishing 3D prints
- Ideal for modeling, prototyping and precision work
- Linear sanding motion for grooves, slots and cavities
- Three selectable speed settings
- Glass-fiber reinforced POLYAMID housing
- Supplied with 8 interchangeable sanding inserts in various shapes

Technical specifications

- Brand: Proxxon
- Model: PS 18
- Power supply: 230 V
- Speed settings: 3 selectable levels
- Tool length: 150 mm
- Weight: 90 g
- Cord length: 2 m
- Housing: glass-fiber reinforced POLYAMID
- Included accessories: 4 straight and 4 angled sanding inserts
- 230 V switching power supply included
