

PROXXON GG/A CORDLESS ENGRAVING SET

The Proxxon GG/A Engraving Set is the cordless version of the popular GG 18, designed for engraving, decorating and personalizing glass, metals, ceramics, plastics and other materials without the restriction of a power cord. Its integrated rechargeable battery, lightweight design and included accessory assortment make it ideal for precision engraving, creative hobbies and decorative work. The supplied glass tumbler allows immediate practice and experimentation. **Key features**

- Cordless version of the Proxxon GG 18 engraver
- Rechargeable 3.6V battery with fast USB-C charging
- Three selectable speed settings
- Includes accessories for engraving, grinding and glass frosting
- Supplied with a glass tumbler for initial engraving practice
- MICROMOT storage box and instruction booklet included
