

## PROXXON LWB/BL BRUSHLESS LONG NECK ANGLE DRILL

The Proxxon LWB/BL 29207 long-neck angle drilling and milling unit is a professional brushless tool designed for work in particularly hard-to-reach areas. Its long-neck die-cast aluminum gear head allows drilling, milling, grinding, cutting and polishing inside hollow bodies and confined spaces. The robust construction and brushless motor provide high performance, long service life and reliable operation for professional and industrial applications. **Key features**

- Powerful, quiet and durable brushless motor
- Long-neck angle gear head for difficult access areas
- Suitable for drilling, milling, grinding, cutting and polishing
- Especially useful for tile processing applications
- Die-cast aluminum gearbox with multiple ball bearings
- Ergonomic handle with soft-grip inserts

### Technical specifications

- Brand: Proxxon
- Model: LWB/BL
- Part number: 29207
- Power supply: 230 V
- Power: 250 W
- Motor: brushless
- Variable speed: up to 16,000 rpm
- Transmission: long-neck die-cast aluminum angle gear head
- Housing: glass-fiber reinforced POLYAMID
- Applications: drilling, milling, grinding, cutting and polishing in hard-to-reach locations
- Supply: SOLO version (accessories not included)
