

GLASSBLOWER'S COMPANION BOOK

This book is about Giberson's views on glass technology. It is a collection of designs, essays, and glassmaking ideas which focus on the underlying philosophy of hot glass. It is a document that will be of interest to anyone who works with glass whether he/she is a glassblower, a pate de verre caster, or a modern beadmaker even someone who simply collects and loves glass. Archaeologists will be especially interested in the ancient glass explanations, as Giberson focuses on simple ideas that actually work.
