

ECOSOYA PILLAR BLEND WAX FOR MOLDS

EcoSoya Pillar Blend is the new 100% vegetable wax, made with soybean oil. Natural and biodegradable, it is not tested on animals, does not contain palm oil, petroleum, paraffin, or beeswax.

It is made without the use of pesticides and herbicides, and free of toxic substances and genetically modified elements. EcoSoya Pillar Blend is intended for making molded candles but is also suitable for making "tarts" or votive candles. It has a great scent and perfectly blends with fragrances. Once cooled, it is easily removed from the mold. Candles made with EcoSoya wax have an attractive appearance and withstand any type of climate.

INSTRUCTIONS

USE:

- Heat the wax to a minimum temperature of 68°C and a maximum of 85°C, stirring until the wax is completely melted.
- Do not heat to excessively high temperatures: the wax may yellow after pouring.
- We recommend adding fragrances at a temperature of 85°C, stirring gently for two minutes and pouring at around 75°C for optimal results.
- The use of additives is not recommended with this wax.
- If adding fragrances, we recommend not exceeding 12% by weight.
- After pouring, we recommend waiting approximately 48 hours before lighting.

IN COMBINATION WITH:

- Liquicer
- Powder pigments
- Wax pigment pastilles
- Any wick except round for gel wax
