

BORON-NITRIDE MOLD RELEASE SPRAY ZYP

Release agent for molds with boron nitride in spray version.

- Easy to use, it allows obtaining a release layer on ceramic and stainless steel molds.
- Particularly suitable for high-definition molds, such as casting.
- Ideal for applications up to 980°C.

INSTRUCTIONS

- Clean the surfaces to be treated from oils, dirt, deposits, etc.
- Shake the can for at least 1 minute.
- Hold the can at a distance of 20 - 30 cm from the surface and apply a thin and even layer with regular movements.
- Allow to dry for 1-2 minutes and reapply if necessary.
