

PORCELAIN BURNISHING MEDIA 6X6MM

These pre-treated hardwood media is ideal for dry tumbling operations. This media can be used for light deburring and finishing of metal, or for smoothing and finishing plastics. It is effective and durable for a variety of mass finishing applications for materials including metals, wood, ceramics, plastics and more. The square corners of these cubes help to finish small details, reaching crevices without getting media lodged in them.

Cube dimensions: 4 x 4 mm
