

## DIAMOND DRILL BIT W/ WATERJECTOR - SHAFT A

Diamond hollow drill with water ejector. Our diamond hollow drills are completely interspersed with diamond in the coating and they are grinded between peaks. This production procedure of grinding effects a smaller abrasion with high rotation precision. Shaft "A" type, diam. 4 mm., to be used with chuck or 3 jaws chucks.

Rotation suggested: 3500 - 5000 rpm.

### SPECIFICHE

SKU	Diameter
17107	2,5 mm
17108	3 mm
