

MORETTI GLASS SHEET - 916 CRYSTAL BROWN AVVENTURINE

Moretti (Murano) Glass sheet. This glass is mainly used for glass fusing application and is compatible with Millefiori, Rods and Murano frits.

Fusing temperature is around 740 - 760°C , a temperature that is perfect if used with *Microwave containers Hi-gloo*.

This glass is suitable for stained glass and mosaic applications as well, but please note, some colors (**Strikers**) can turn to the actual color only after fusing.

Please note: pictures are a reference only.

COE: 104

Thickness: 3/4 mm

Glass is cutted by hand and dimensions are approximate.

SPECIFICHE
