

ALKEME CIRCLE W. HOLE PREMIUM BLANK

ImpressArt blanks are the canvas for your metal stamping projects and come in hundreds of shapes.

- **Alkemé is a unique tin alloy, tarnish free and easy to stamp.**
 - Shape: circle with hole
 - This alloy is lead, cadmium and nickel free
 - Alkemé has a weight and gauge one would expect from a fine piece of jewellery.
 - All Alkemé blanks are 1.2 mm thick. This provides enough metal material to allow the stamp to make a deep impression.
 - Alkemé can be easily polished with hand burnish, tumble or flexible shaft tool to get a high shine.
 - Alternately, using a fine abrasive you can achieve a nice matte finish.
- Alkemé can be easily formed with a dapping block.
