

CHARBONNEL BLACK SATIN LAMOUR LIQUID PAINT

The Black Lamour Satin Paint is a liquid matte paint for etching. It is an excellent alternative to solid etching paint.

- It remains hard after drying with a satin finish.
- Unlike solid paint, this paint is incredibly durable.
- Once applied, you don't have to worry about the paint chipping.
- This gives you plenty of time to etch your plate.
- Containing petroleum essence, it dries faster than Ultraflex paint.
- It should only be applied to cold plates after they have been degreased.
- You can apply it with a soft brush or pour it directly onto the tilted plate.
