

## PNEUMATIC TOOTHED CHISEL WITH WIDIA TEETH 12.5 MM SHANK

Toothed chisel for stone carving with 12.5 mm shank for pneumatic hammers, equipped with tungsten carbide teeth. Ideal for refining marble and granite after roughing, it smooths tool marks and creates the characteristic comb-like finish, also suitable for anti-slip textures. Made in Italy and available in various widths with 2, 3, 4 or 5 teeth. **Key features**

- 12.5 mm shank for pneumatic hammer use
- Tungsten carbide teeth
- Comb-texture finishing on marble and granite
- Made in Italy
- Available with 2–5 teeth
