

## JESMONITE - SATIN ACRYLIC SEALER

Jesmonite® Satin Sealer is a pure acrylic coating compatible with Jesmonite AC100 and AC300. It is a durable and flexible product designed to achieve a satin finish on objects made of Jesmonite. This new product is easily applicable with a brush, roller, or spray and can be diluted in various formats to achieve different finishes. **Key Features**

- Enhanced water and stain resistance
- Easy application with brush, roller, or spray
- Satin finish
- Can be pigmented for special effects
- UV resistant

Items sealed with Satin Sealer will require reapplication every 6-10 years to ensure optimal results. Please note that when used together with AC300, it will not provide the same level of protection if used outdoors.
