

COBRA 102 - LINSEED OIL

Cobra Water-Mixable Linseed Oil

Create your own medium or make your paint fatter with Cobra water-mixable linseed oil. This oil increases the flow and transparency of the paint. Linseed oil dries more quickly compared to safflower oil. Due to the drying time, we recommend using linseed oil for the lower layers of your painting. Though linseed oil does yellow slightly over time, it also provides you with a more stable paint film.

Properties:

- Water mixable
- Makes the paint fatter
- Makes the brush stroke run slightly
- Increases the flow, gloss and transparency
- Lengthens the drying time of the paint
