

AMSTERDAM 122 - GLOW IN THE DARK MEDIUM

Amsterdam Glow in the Dark Medium - Add an Extra Dimension to Your Work

Add an extra dimension to your work with Amsterdam glow in the dark medium. Thanks to a phosphorescent pigment, areas painted with this medium will continue to glow in the dark long after their application. Do not mix this medium into acrylic paint, doing so will remove the glow-in-the-dark effect. Apply the glow in the dark medium as a final layer on your work for optimal results. **Amsterdam Glow in the Dark Medium**

- Apply as the final layer for optimal results
- Glowing time greatly depends on the light source and duration of exposure to light
- Mixing with other colors will greatly reduce the glowing effect
- Waterproof when dry
- Clean utensils with water
- Apply at temperatures above 10°C and store free of frost
