

LYONS L335 - MEZZOTINT ROCKER

The Lyons Mezzotint Rockers are essential tools for achieving a uniform grain on metal plates, using a rocking motion to create thousands of tiny burrs. With a mezzotint rocker burrs are made in a copper or zinc plate by moving the mezzotint rocker zigzag across the plate, and in several directions. By working the plate everywhere in this way, you can print a deep velvet black, which is not possible in any other way. **Main**

Features:

- Wooden handle
- High-carbon tool steel, hardened
- Total length 185 mm
- Widths available: 25 – 150 mm
- Lines per inch: 65, 85, and 100

Benefits for You:

- Exceptionally even mezzotint grain
- Rich, uniform tonal effects
- Precise control over burr depth
- High durability and strength
- Comfortable grip for extended use
