

STAINLESS STEEL FIRING MESH

These lightweight stainless-steel mesh racks come with two pre-bent sides and are perfect for supporting small pieces in enamelling kilns; they heat up quickly, take up little space and create less of a heat sink than heavier shelves, giving you faster, more even firings. **Key features**

- Fine stainless-steel mesh surface
- Two pre-bent edges for stability
- Lightweight with low thermal mass
- Fits small kilns and delicate pieces
- Corrosion-resistant, long-lasting

Technical specifications

- Material: lightweight stainless steel
- Construction: wire mesh with 2 pre-bent sides
- Compatibility: bench-top enamelling kilns
- Role: support rack for light pieces
