

MOTHER OF PEARL CABOCHON

Mother of pearl is a natural organic material obtained from the inner layer of shells, prized in jewelry for its iridescent luster and soft color reflections. Used since ancient times for ornaments and decorative objects, mother of pearl gives jewelry a bright, timeless elegance. These stones are supplied in an oval cabochon cut with flat back, a finish that enhances the natural sheen and simplifies setting. Available in white, grey and pink, they are ideal for pendants, rings, earrings and decorative accents in handcrafted and traditional jewelry. As a heat-sensitive natural material, they must not be kiln-fired or used with Art Clay Silver or Metal Clay during firing.

Key features

- Natural mother of pearl with iridescent reflections
- Cabochon cut highlighting the luminous surface
- Oval shape with flat back for easy setting
- Suitable for handcrafted and traditional jewelry

Technical specifications

- Material: natural mother of pearl
