

STEEL CALIPER FOR POTTERY AND SCULPTURE

Steel calipers designed to provide accuracy and precision when sculpting or working with ceramics. Made of steel, this lightweight yet durable tool measures both inside and outside dimensions and allows you to transfer them directly to clay or other materials. It removes guesswork from the process, ensuring consistent and well-proportioned results. Available in 3 sizes.

Key features

- Lightweight and durable steel construction
- Accurate inside and outside measurements
- Ideal for sculpting and ceramics
- Easy transfer of measurements to material
- Available in 3 sizes

Technical specifications

- Material: steel
- Measurement type: internal and external
- Use: clay and modeling materials
- Sizes: 3 available
