

SQUARE STEEL TUBE

The square iron tube profile is a durable, versatile component ideal for trims and corner protection, offering rigid edge reinforcement and easy welding for custom assemblies. Its square shape ensures uniform load distribution, accepts surface treatments like painting or galvanizing, and comes in various sizes; dimensions are listed as side x side x thickness x length for clear specification. **Key features**

- Durable iron construction for long-lasting performance.
- Square cross-section for rigid support and precise alignment.
- Protects and finishes corners and exposed edges.
- Weldable and machinable for custom fabrications.
- Accepts painting, galvanizing or powder coating for tailored finishes.

Technical specifications

- Material: Iron.
- Profile: Square tube.
- Available in various sizes; measurements indicated as side x side x thickness x length.
