

LIDS FOR STAINLESS STEEL CONTAINERS

Stainless steel lids designed for use with matching stainless steel containers, ensuring a stable and secure closure during high-temperature processes. Suitable for artistic and craft applications, they help protect contents and optimise melting, firing or controlled cooling operations. **Key features**

- Made of durable stainless steel
- Compatible with dedicated containers
- Suitable for high-temperature use
- Robust and long-lasting construction

Technical specifications

- Material: stainless steel
- Use: with compatible stainless steel containers
- Resistance: high temperatures
