

STAINLESS STEEL CROSSBARS FOR BAIN-MARIE

Stainless steel crossbars designed for use with thermostatic water baths allow multiple stainless steel containers to be positioned and properly supported inside the tank. They ensure stability during heating and help organise containers efficiently, optimising workspace management. Available in two sizes to suit different configurations. **Key features**

- Made of durable stainless steel
- Compatible with thermostatic water baths
- Provide stable support for multiple containers
- Improve organisation and workspace efficiency

Technical specifications
