

## DIAMOND ABRASIVE DISCS FOR PROXXON LHW

Proxxon diamond sanding discs designed for sanding and polishing cut edges and chamfers on hard and brittle materials. They can also be used for easing sharp edges and creating clean chamfers before final finishing operations. The self-adhesive backing allows quick disc changes and efficient grit progression, making them ideal for porcelain stoneware, natural stone, ceramics and glass. **Key features**

- Diamond sanding discs for grinding and polishing
- Ideal for cut edges, chamfers and precision finishing
- Suitable for easing sharp edges and creating clean bevels
- Self-adhesive backing for quick replacement
- Suitable for glass, porcelain stoneware, ceramics and natural stone
- Available in individual grit packs or complete polishing sets
