

FLEXIBLE ABRASIVE PADS FOR PROXXON PS 18

Proxxon flexible sanding pads for the PS 18 sander are designed to conform precisely to uneven, curved and detailed surfaces. The foam backing adapts to the shape of the workpiece for consistent finishing, while the mesh abrasive structure minimizes dust clogging and extends abrasive life. They are particularly suitable for refining 3D prints, model making and precision finishing applications. **Key features**

- Compatible with the Proxxon PS 18 sander
- Flexible foam body adapts to uneven surfaces
- Mesh abrasive structure helps prevent clogging
- Excellent for sanding and refining 3D prints
- Ideal for modeling and precision work
- Available in three grit options
