

UNDERGLAZE LEAD FREE CAV SERIES

These Underglaze Colours are totally lead-free and have undergone such an ultra refined special process to be perfectly brushable. They can be dry-mixed with each other and they also are suitable for colouring glazes and transparent glazes.

PREPARATION - APPLICATION - FIRING

Mix with water and apply by brush, sponge, or stamping. Sifting always recommended. Airbrush application for professional use only.

Firing temperature: 950°-980°C (Orton cone 08-07).
